

THE STATE OF THE STATES

Agricultural Land Protection Scorecard Highlight Summary

Indiana

Farms Under Threat: The State of the States mapped agricultural land conversion and evaluated state policy responses. The Agricultural Land Protection (ALP) Scorecard evaluated six policies and programs that protect agricultural land from development, promote farm viability, and facilitate the transfer of agricultural land. American Farmland Trust (AFT) conducted research between 2016 and 2019 and used quantitative and qualitative factors to compare approaches that are tied to the land in all 50 states. Results for each policy are summarized in *policy scoresheets*; scores from the scoresheets are combined into Policy Response Scores in the *ALP Scorecard*. The map shows state Policy Response Scores by quartile.

EXTENT OF STATE POLICY RESPONSES TO THE THREAT OF CONVERSION

RELATIVE CONVERSION THREAT

HIGH

Indiana scored among the top states for the conversion of agricultural land to urban and highly developed (UHD) and low-density residential (LDR) uses.

RELATIVE POLICY RESPONSE

LOW

Indiana scored among the lowest states for policies and programs that address the threat of conversion.

HOW IS THIS STATE DOING?

Indiana is in a red box because its conversion threat is higher than its policy response, relative to other states. Learn more at www.farmland.org/farmsunderthreat

HOW INDIANA STACKS UP

Indiana
Score

Median
Score

Top
Score

Policy scoresheet scores: Final policy scores compared to the median and the highest scores achieved by all states that have implemented each policy. Even among high-response states, no state received a perfect score for any individual policy; every state has the potential to do more.

ABOUT THE POLICIES AND PROGRAMS

PURCHASE OF AGRICULTURAL CONSERVATION EASEMENTS

Purchase of agricultural conservation easement (PACE) programs permanently protect farmland and ranchland from non-farm development. They compensate landowners who voluntarily place an agricultural conservation easement on their property.

LAND-USE PLANNING

Land-use planning policies manage growth and stabilize the land base. Most states delegate planning authority to local governments, but some play a more active role, requiring localities to develop comprehensive plans, identify agricultural resources, and adopt policies to protect them. Indiana authorizes but does not require local comprehensive planning.

PROPERTY TAX RELIEF

Property tax relief (PTR) programs reduce property taxes paid on agricultural land. The most common approach is use-value assessment (UVA), which assesses farmland and ranchland at its current use value. Indiana refers to agricultural assessments as "True Tax Values." Indiana does not require verification that land is in active agricultural use in order to be eligible.

AGRICULTURAL DISTRICTS

Agricultural district programs encourage landowners to form special areas to support agriculture. Farmers receive protections and incentives including: limits on annexation, limits on eminent domain, protection from the siting of public facilities and infrastructure, and tax incentives. Less common is requiring district enrollment to participate in state-administered PACE programs.

FARM LINK

Farm Link programs connect land seekers with landowners who want their land to stay in agriculture. Administered by public or private entities, they offer a range of services and resources, from online real estate postings to technical assistance, trainings, and educational resources. AFT only included publicly supported programs.

STATE LEASING

State leasing programs make state-owned land available to farmers and ranchers for agriculture. Sometimes their primary purpose is to make land available for agriculture. More often, agricultural use is secondary to generating income for a public purpose or protecting wildlife habitat.

INDIANA: KEY FACTS

\$0.00

AMOUNT INVESTED PER
CAPITA IN PERMANENTLY
PROTECTING FARMLAND
THROUGH 2017

Among states with PACE
Smallest (TX): < \$0.01
Largest (DE): \$6.03
